

**CARESCAPE Monitor B450**  
Connecting intelligence and care.

# Keeping the flow of vital data moving.

Patient recovery is often tied to mobility. Now, monitoring patient progress doesn't need to be tied to a wall. The CARESCAPE\* Monitor B450 is a compact bedside monitor with wireless capabilities,<sup>†</sup> so it can start with your patients at the bedside and stay with them virtually anywhere, giving you continuous patient monitoring every step of the way.

Portability, accuracy, and support of combination monitoring:<sup>††</sup> The CARESCAPE Monitor B450 enables early mobility of patients and easy transition from high to low acuity. The system is well-suited for surgery centers and any care areas where continuous transport capabilities are needed across your healthcare enterprise.

## Uninterrupted vital data is key.

The wireless and highly portable design of the CARESCAPE Monitor B450 supports uninterrupted patient monitoring and data continuity. When used with the CARESCAPE Patient Data Module, vital patient data can be moved easily from one monitor to the other without interruptions to data access.

<sup>†</sup>Capability not available in all regions. Please consult your sales representative.

<sup>††</sup>ApexPro\* telemetry required.

# Clinical intelligence you need.

Put all the essential clinical parameters you need in your hands, and put more data within easy reach. The CARESCAPE Monitor B450 gives you two-way connectivity to your hospital data systems, including your EMR, lab, MUSE\* cardiology information system, or other sources. The CARESCAPE Monitor B450 supports fast treatment decisions and a more efficient workflow at every stage of care.

## Real flexibility that fits your real world.

The CARESCAPE Monitor B450 accommodates a single-width e-module and a multi-parameter module, so you can customize the monitor for specific patient or acuity requirements as needed. The monitor is part of a complete modular platform of monitoring solutions that work together across your hospital, where multi-parameter modules move easily between monitors, for reliable data continuity that supports a smart workflow and the clinical excellence you demand.

Scalable options for software, hardware, additional displays, and other capabilities let you build your system as your needs and budget allow. And the easy-to-use, intuitive system helps reduce training time while keeping your clinicians at the forefront of monitoring technology.

**For more information about the CARESCAPE Monitor B450 and the entire portfolio of CARESCAPE modular monitors, please contact your GE Healthcare representative.**

**Configurable alarm settings** can be adapted to your care area needs, helping reduce alarm fatigue and supporting a restful patient environment.

## About GE Healthcare

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost. In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.

Our “healthymagination” vision for the future invites the world to join us on our journey as we continuously develop innovations focused on reducing costs, increasing access and improving quality around the world. Headquartered in the United Kingdom, GE Healthcare is a unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employees are committed to serving healthcare professionals and their patients in more than 100 countries.
